TECHNICAL SKILLS

Javascript, ReactJS, ViteJS, NextJS, React Native, Expo, MongoDB, FireBase, PostgreSQL, MsSql, CosmosDb, ASP.NET Core Web API, EntityFramework, C#, HTML, CSS, C++, Python, Git

PROJECTS

- HorseMorse – Trip Tracker (iOS Application)
- Developed a cross-platform mobile application for trip tracking, route history management, and driving analytics. Implemented GPS-based trip recording, distance calculations, journey history, fuel and expense tracking features, and data visualization to help users monitor vehicle usage and travel costs. Focused on performance, intuitive user experience, and reliable location tracking using modern mobile development technologies.
- Technologies: React Native, Expo, TypeScript, Expo Location, AsyncStorage/SecureStore, iOS

- CVPilot – Job Finder (iOS Application)
- Developed a native iOS application using Swift and SwiftUI that helps job seekers create professional resumes, optimize them for Applicant Tracking Systems (ATS), and discover relevant job opportunities. Implemented AI-powered CV generation, ATS compatibility analysis, job description matching, job search features, Apple Sign In authentication, push notifications, and subscription-based monetization. Focused on delivering a smooth and modern user experience that simplifies the job application process and increases users' chances of success in automated recruitment systems.
- Technologies: Swift, SwiftUI, StoreKit, RevenueCat, UserNotifications, AuthenticationServices (Apple Sign In), REST APIs, iOS

- Reserve – Rəqəmsal Rezerv (iOS & Android Application)
- Developed a cross-platform mobile application using React Native and Expo for managing digital reservations and booking processes. Implemented core features such as reservation creation, scheduling, booking management, and user interaction flows across both iOS and Android platforms. Focused on delivering a consistent and responsive user experience with shared codebase architecture, efficient state management, and optimized performance for mobile devices.
- Technologies: React Native, Expo, TypeScript, iOS, Android

EDUCATION

Azerbaijan State Oil and Industry University (2021-2025)

- Mechanical Engineering, Bachelor

StepIT Academy

- Software Development (2021-2024)

WORK EXPERIENCE

Fullstack Mobile Developer - Webonly.io - Baku, Azerbaijan (Project based, June 2025 -

February 2026)

- Development of Next JS/React JS Applications
- Development of React Native Applications
- Development of ASP.NET Web API Applications
- Leading the Software Development Team

Fullstack .NET Developer - ASOIU IT Department - Baku, Azerbaijan (Intern, 2022-2023)

- Development of React JS Applications
- Development of Blazor Applications
- Development of ASP.NET Web API Applications
- Leading the Software Development Team

.NET Development Instructor - ASOIU EduLab - Baku, Azerbaijan (Part-time, 2022-2023)

- Teaching the students of ASOIU about the First Step of Development
- Teaching the students of ASOIU about .NET (C#) Development
- Teaching the students of ASOIU about OOP Programming

React Development Instructor - IT Innovation - Baku, Azerbaijan (Full-time, September 2023 - November 2023)

- Teaching the students about the First Step of FrontEnd Development
- Teaching the students about ReactJS Development

Software Development Instructor - StepIT Academy - Baku, Azerbaijan (Contract, October 2023 - Present)

- Teaching the students about the First Step of Software Development
- Teaching the students about Python, C++ Programming Languages
- Teaching the students about Web Development
- Teaching the students about Robototechnics with Python and Arduino
- Teaching the students about Figma Design and Tools

Fullstack Mobile Developer - Anonymous Corporation - Baku, Azerbaijan (Contract, June 2023 - August 2023)

Development of Mobile Applications
Development of Backend Applications

Freelancer Fullstack Developer - (Remote, June 2023 - Present)

Development of Web Applications
Development of Backend Applications
Development of Mobile Applications

CEO - Mahal CO - (December 2022 - Present)

Growing and Managing Technology Company
Team leading to Process of Development of Applications

Fullstack Mobile Developer - GoGo - Uzbekistan (Project based, June 2024 - December 2024)

Development Backend Applications for Taxi Clients and Drivers
Development Mobile Applications for Taxi Clients and Drivers
Development Mobile Package for Working Yandex Maps

Fullstack Developer - DataBiz - Project based - Baku, Azerbaijan (Project based, June 2024 - September 2024)

Development Backend Applications for Government Ministry of Taxation
Development Frontend Applications for Government Ministry of Taxation
Development User Tracking Solutions for Government Ministry of Taxation
